

TORONTO LAKESHORE DENTAL

Dear

Welcome to our office, and thank you for selecting Toronto Lakeshore Dental as your dental health care provider.

We appreciate the faith you have placed in us by selecting our team to optimize your oral health and dental care. We will live up to your expectations by making every effort to see that your dental visits are as comfortable as possible.

Our extended hours make scheduling appointments convenient. Dr. Moore and Dr. Joo are both able to offer different areas of expertise, which allows for a wide array of treatment options we offer our patients. Some of these options include implants, crowns and bridges, dentures, oral and IV sedation, Invisalign (invisible braces), root canals, in-office whitening, and cosmetic dentistry.

We pride ourselves on making dentistry a pleasant experience, and are committed to providing you with the best dental care possible using modern techniques and state-of-the-art technology. Most importantly, we are sensitive to our patients' needs and recognize that each patient case is unique. As part of your treatment, you can expect a thorough oral examination including necessary x-rays, a preventive prophylaxis (teeth cleaning), and a discussion about how you can help prevent dental disease through good health habits. Following a careful diagnosis, we will discuss a treatment plan that is suitable for you.

We encourage open communication about your dental care. We want you to know all of the options available to you, have all of your questions answered, and make you feel comfortable and informed before going ahead with any treatment. We will bring available treatment options to your attention and include any brochures pertaining to those options in this package. We encourage you to review this information and look forward to discussing this information with you when you feel the time is right.

We look forward to seeing you at your first appointment.

Sincerely yours,

The Team at Toronto Lakeshore Dental
